

PROFILE

Analytical and detail-oriented Full-Stack Developer with a solid Project Management Background. A knack for the effective and efficient conception and provision of elegant, user-friendly solutions. Has a success story in developing a localization of an ERP system, a CRM online portal and a modular website for a German Start-up. Recently upgraded web applications (React, Angular). Equipped with a comprehensive understanding of Prince2 and Scrum. While having spare time, I participate in hackathons, workshops and web developer meetups.
